## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1, 4-9, and 12-20 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a system for inhibiting hackers from gaining access to a networked site by upgrading a second communication link from clear to encrypted. Each of the independent claims identify the uniquely distinct feature of "providing a public key in the form of a digital certificate across an encrypted first communication link and using the public key in the certificate to encrypt communications sent on a second communications link." The closest prior art, Douglas (US 6,223,287), discloses a conventional system for establishing a secure communications link between a client and server fails to anticipate or render the above obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
